

QUALITY AND FOOD SAFETY POLICY

Quality and Food Safety Policy

It is the company's policy to provide products and services that comply with applicable government requirements, corporate standards, customer requirements and other pertinent parties in quality and food safety matters.

Our management systems, Company standards, Quality objectives and personnel training programs provide the quality and safety of our products.

These systems are regularly reviewed, updated, and communicated to meet changing requirements, including changes in the Company's strategy, to support the needs of stakeholders, enhance operational excellence and promote a culture of continuous improvement.

Objectives of Quality and the Food Safety Management System

- Provide the food, pharmaceutical and other industrial segments with ingredients derived from corn, cereals, and vegetables, which comply with the requirements of legislation, organization, local standards, and that meet the specifications of food safety, quality, quantity, and delivery time agreed with customers, thus effectively anticipating market needs.
- Promote a positive food safety culture, ensuring the identification, prevention, and control of hazards in processes and products, ensuring the safety and quality of the ingredients.
- Promote a continuous process of improvement of our integrated quality and food safety management system that supports the Company's operational excellence, as well as to ensure the skills related to quality and food safety of the personnel involved in all management system processes.
