

NON-GMO

23 February 2023

INGREDION (THAILAND) CO., LTD.
Thailand

Product(s): PENPURE 37

Dear Sirs,

We are pleased to confirm that the above referenced product(s) is produced starting from non-GMO sources and/ or certified as in conformity with Non-GM Identity Preserved/ Non-GMO Project Verified Program/ other Non-GMO certificates¹ and complies with the following requirements:

- Regulation (EC) 1829/2003 on genetically modified food and animal feed² relates to the labelling of consumer products with ingredients that contain or consist of genetically modified organisms (GMO), or contain ingredients produced from GMO. These products have to be labelled as such. It is not possible to offer any materials described as ‘GM-Free’ because this term has not been legally defined and theoretically, adventitious contamination can arise from cross-pollination or during handling and storage. It is important to note that these regulations do not apply to products from non-GM sources.
- Regulation (EC) 1830/2003 on the traceability and labelling of GMO³ provides a harmonised EU system on the documentation needed to trace and label GMO throughout the entire supply chain. The Regulation applies to products consisting of, or containing, GMO and food and animal feed produced from GMO at all stages of placing on the market. It applies to the traceability of the GMO event via unique identifiers and to the traceability and identity preservation of the GM source.

Thank you for your interest in Ingredion’s products. Please contact us if we can be of any further assistance.

Note:

¹ A copy of Non-GM Identity Preserved program/ Non-GMO Project Verified/ Non-GMO certificate is available upon request. Ingredion reserves the right to update this standard from time to time at its sole discretion

² Regulation (EC) No 1829/2003 of the European Parliament and of the Council of 22 September 2003 on genetically modified food and feed, as amended

³ Regulation (EC) No 1830/2003 of the European Parliament and of the Council of 22 September 2003 concerning the traceability and labelling of genetically modified organisms and the traceability of food and feed products produced from genetically modified organisms, as amended
